Dear Mr. Conrad:

During the course of the Commission's hearings, expert testimony has been elicited concerning various kinds of physical evidence. We would like you to determine, and ask Frank Irvine if necessary, those exhibits which these expert witnesses have identified. In each case, the item should be given to the person who found it, so that he can identify it by his signature. If he cannot do it fully, a photograph should be taken between him and the item, with him holding it, and the item then identified by him by inspection.

As an example, Lieutenant Day of the Dallas Police Department identified one of the three rifle cartridge cases as being put on November 22. Those cartridge cases should be treated both from 12:30 p.m. to the person by whom they were found, at the time that he found them. The chain of possession need not be traced further than November 22.

Exhibits to be identified are as follows:

(1) The three rifle cartridge cases, C1, C2, C3

(2) The rifle bullet, C4

(3) The two rifle-bullet fragments, C5 and C6

(4) The rifle cartridge, C7

(5) The bullet from the Tomlinson revolver, C8

(6) The revolver cartridge cases, C9-C11
